Geometric Line Art - Learning Activity
## 8 Points/ 45 degree angle (8 X 45 = 360)

Directions - For this activity you must use a ruler. Use the ruler to connect points around the circle. Your line must start at a point and finish at a point. Once you have a start, your lines may start in the corners where two lines meet.

example

Geometric Line Art - Learning Activity
5 Points/ 72 degree angle (5 X 72 = 360)

Directions - For this activity you must use a ruler. Use the ruler to connect points around the circle. Your line must start at a point and finish at a point. Once you have a start, your lines may start in the corners where two lines meet.
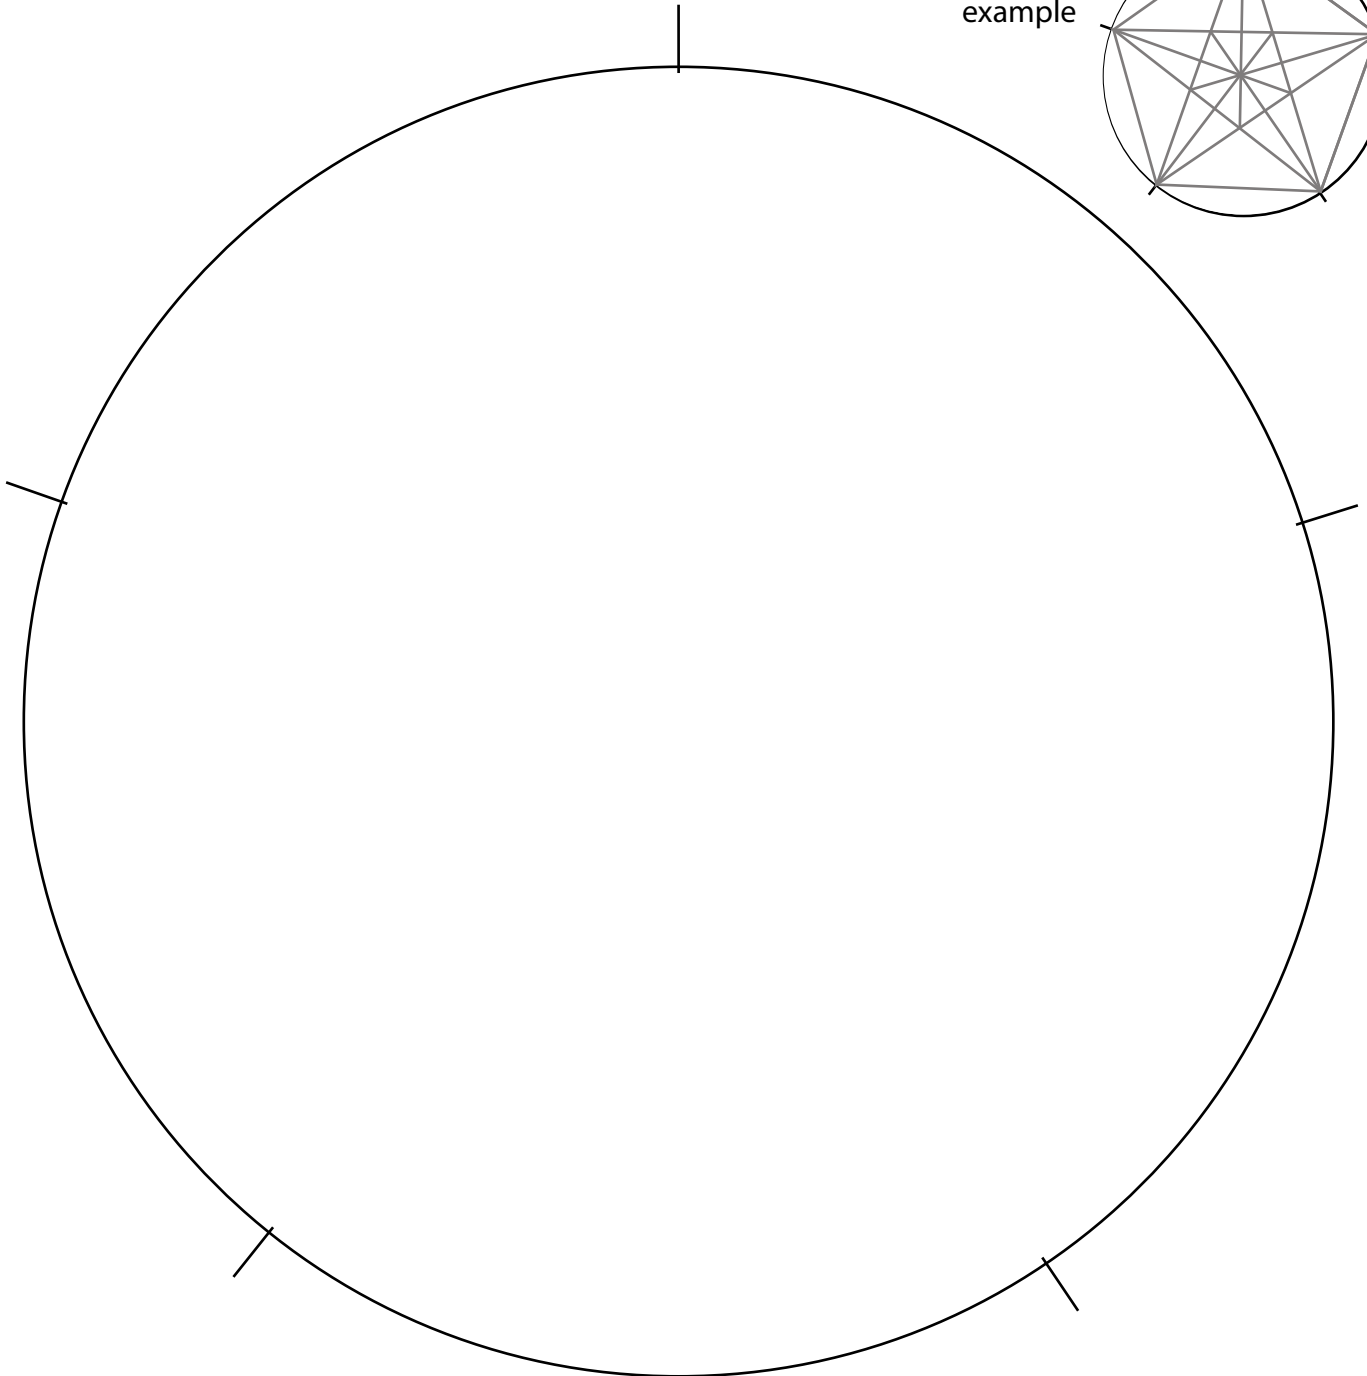

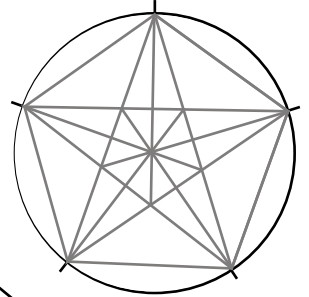

example

Geometric Line Art - Learning Activity
6 Points/ 60 degree angle (6 X 60 = 360)

Directions - For this activity you must use a ruler. Use the ruler to connect points around the circle. Your line must start at a point and finish at a point. Once you have a start, your lines may start in the corners where two lines meet.
